frequency response of $h \in \mathcal{A}$	n.a.	$(\phi_\omega(h))_{\omega \in W} = \omega \mapsto \phi_\omega(h)$

Easy decision, isn't it?

If your tables tend to look like the above
you may find this guide helpful

Background

- Up to 2005, I had been writing technical publications for 8 years, creating roughly 35 fully reviewed papers, 2 theses, 20 proposals, and many other pages of technical writing
- In each case I spent a lot of effort on content and visual presentation; I am really picky
- In 2005 I learned (from Goran Frehse, thank you!) that I had had **no clue how to make tables**
- I summarize what I have learned in this short guide

Resources

- “Chicago Manual of Style,” The University of Chicago Press
- Latex users: Use booktabs.sty and its documentation
<http://texcatalogue.sarovar.org/entries/booktabs.html>

Most Important Guidelines for Making Tables

- **Avoid vertical lines**
- **Avoid “boxing up” cells, usually 3 horizontal lines are enough: above, below, and after heading (see examples in this guide)**
- **Avoid double horizontal lines**
- **Enough space between rows**
- **If in doubt, align left**

Example: Before and After

Before:

	abstract	realized
shift operator	q	$T_1(x) = x$
shift operation	\diamond	\cdot
space mark	t_n	C_n
k -fold shift operator	$T_k(q)$	$T_k(x)$
space shift	$q \diamond t_n = \frac{1}{2}(t_{n+1} + t_{n-1})$	$x \cdot C_n = \frac{1}{2}(C_{n+1} + C_{n-1})$
signal	$\sum s_n t_n$	$\sum s_n C_n(x)$
filter	$\sum h_k T_k(q)$	$\sum h_k T_k(x)$

also the first column
gets a header

everything left aligned

three horizontal lines only,
I like the top and bottom ones bolder

After:

more space between rows

concept	abstract	realized
shift operator	q	$T_1(x) = x$
shift operation	\diamond	\cdot
space mark	t_n	C_n
k -fold shift operator	$q_k = T_k(q)$	$T_k(x)$
space shift	$q \diamond t_n = \frac{1}{2}(t_{n+1} + t_{n-1})$	$x \cdot C_n = \frac{1}{2}(C_{n+1} + C_{n-1})$
signal	$\sum s_n t_n$	$\sum s_n C_n(x)$
filter	$\sum h_k T_k(q)$	$\sum h_k T_k(x)$

space to the left edge removed

space to the right edge removed

In Latex

- Style: `\usepackage{booktabs}`
- Horizontal lines: read documentation of booktabs
<http://texcatalogue.sarovar.org/entries/booktabs.html>
- More space between rows:
`\renewcommand{\arraystretch}{1.2}` (or 1.3)
- Remove space to the vertical edges:
`\begin{tabular}{@{}l l l@{}} ...`

Further Examples

- **The following tables are taken from the magazine Economist**
- **They demonstrate**
 - How to handle multiple levels of hierarchy
 - Alignment, handling of long headers
 - The use of light gray to further divide the tables
 - Horizontal lines provide readability under denser packing and when lots of numbers are organized
 - Sans serif fonts are preferable for readability; of course, if you need math symbols and use latex, then stick with roman
 - Title above table, sometimes with unit of measure
 - The use of footnotes
 - Different types of horizontal lines
(I personally don't like the use of more than two)
